DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward J. Wise on January 6, 2010.

The application has been amended as follows:

IN THE CLAIMS:

Add new claim 9:

9. (New) A method of manufacturing a fuel cell comprising an anode, a cathode, and a solid polymer electrolyte membrane arranged between the anode and the cathode,

the method including an electrolyte forming step of forming the cathode by the method of manufacturing a cathode for a fuel cell according to claim 1.

Allowable Subject Matter

2. Claims 1, 2, 5, 6 and 9 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor suggests a method of manufacturing a cathode for a fuel cell

wherein a precursor layer is formed by coating a liquid containing a catalyst and a solvent a adapted to dissolve or disperse the solvent; the precursor layer is provided with a potential higher than 1.3 V with reference to a standard hydrogen electrode so as form the catalyst layer, wherein the a pre-formed metal complex is used as the catalyst in the coating liquid and is applied as is to form the precursor layer; and the potential is provided by potential sweeping, which is performed in an oxygen-saturated aqueous sulfuric acid solution.

The closest prior art is Sotomura and Cooper.

Both Sotomura and Cooper are silent to the potential sweeping being carried out in an oxygen-saturated aqueous sulfuric acid solution.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEPHAN ESSEX whose telephone number is (571) 270-7866. The examiner can normally be reached on Monday - Friday, 7:30-5:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dah-Wei Yuan can be reached on (571) 272-1295. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
